

VOLCANIC LANDSCAPE

Personally I would take this even a step further and look at a stunning **volcanic landscape**, with dark boulders or sand that dramatically contrast with the beauty of our model. See my refs.

In fact after having gone through tons of references, I'd be inclined to step out of out confort zone and go for a wild, remote location I haven't seen a million times before in other ads.

ROCK FORMATION OF UNUSUAL SHAPES AND C°LOURS, CLIFFS, VOLCANOS, ETC... TBD
